

SENETT CONTROL

Industrial Controllers by Gessmann Group

General Terms and Conditions

For our general conditions of sale and delivery please refer to our website at: www.senett.ca

Please Note: All prices quoted do not include local taxes, duty or brokerage fees, and are FOB Senett Control.

The prices quoted direct from the factory do not include shipping and handling. Shipping and handling is charged at cost, and is not refundable. The minimum invoice amount is \$100.00 Canadian or US dollars as applicable regardless of the value of the individual purchase price of goods. Therefore, we recommend combining small orders.

We are entitled to pass on any additional production and or handling costs resulting from modifications to the original order by the customer, both technical modifications and non-compliance with original delivery dates.

Payments are due within 30 days from date of invoice. All payment terms are subject to credit approval. Other acceptable methods of payment are VISA, and Master Card, and will be processed at the time of order. All orders exceeding approved credit limit will require a down payment at the time of order. The above conditions of payment shall be deemed agreed and accepted upon receipt of your purchase order.

Title to the goods sold shall remain the property of the seller until such time as payment in full has been received by the seller from the buyer. In the event that payment has been made by uncertified cheque, title shall only pass 14 days after the date of the deposit of any such cheque received from the buyer provided that such cheque has not been dishonored or stopped.

The delivery period only commences upon clarification of all technical details. Unforeseen circumstances justify an appropriate extension of the delivery period. All documents, such as drawings, dimensional drawings, circuit diagrams, etc., are non-binding. We reserve the right to make any changes necessary, in particular changes which serve the technical advancement.

Warning: Parts of these electrical devices carry hazardous voltages when in operation.

Installation, maintenance, modification, or retrofitting may only be carried out by qualified personnel in consideration of the appropriate safety precautions.

Non-compliance may result in death, severe injuries or substantial property damage.
